

One-page website, ready to paste — mobile-friendly, clear sections, built to convert care providers into pilots and paying customers.

HERO SECTION

Less paperwork. More person-centred care.

AI-assisted documentation built exclusively for UK adult social care.

Turn rough notes or voice input into professional, inspection-ready records in seconds — so your team spends less time writing and more time caring.

 Daily Notes  Incident Reports  Care Plans  Risk Assessments

[\[Book a Free Demo\]](#) [\[Start Free Pilot\]](#)

 AI drafts — reviewed and approved by you. Never replaces professional judgement.

PROBLEM / SOLUTION

The paperwork is piling up. The care isn't waiting.

Carers spend 2–4 hours every shift writing notes. Handover is rushed. Records are inconsistent. And when paperwork slips — CQC notices, compliance gaps, and staff burnout follow.

We fixed it.

CareWrite AI turns bullet points, voice notes, and quick observations into clear, professional, person-centred documentation — instantly. Every draft is written in positive, strengths-based language. Every record is reviewed and signed off by your team before it's saved.

Faster notes. Better quality. Fully compliant.

HOW IT WORKS — 3 Simple Steps

1. Tell us what happened

Type quick bullet points, speak your notes, or jot observations — no fancy typing required.

2. AI drafts it for you

Our care-trained AI instantly creates a complete, well-structured record — written the way inspectors want to see it.

3. You review & approve

Read it. Tweak if needed. Click Approve. Done. Saved securely. Audit-ready.

“It used to take me 20 minutes to write a daily note. Now it takes 3.” — Early Pilot Tester

EVERYTHING YOU NEED IN ONE PLACE

Smart Documentation

- Daily & shift notes
- Incident reports
- ABC behaviour charts

- Handover summaries
- Medication support records
- Progress & outcome reviews

Care Planning

- Person-centred care plan templates
- All standard sections pre-built
- Review schedules & tracking

Risk Assessments

- Falls, Fire, Medication, Community Access
- Financial Abuse, Self-Neglect, Lone Working
- Infection Control & Challenging Behaviour
- Custom templates on request

Built-In Compliance

- UK GDPR compliant — registered with ICO

- Role-based permissions & MFA security
- Full audit trail — who viewed, edited, approved
- Inspection-ready exports — PDF & CSV
- Nothing saved until a staff member reviews & signs

Simple Pricing — No Hidden Fees

Pay per service user. Not per staff. Fair, predictable, scales with you.

Tier Price p/month What's Included

Basic £1.50 per service user AI daily notes, handover, voice input

Standard £2.00 per service user + Care plans, risk assessments, ABC charts

Premium £2.50 per service user + Advanced reporting, priority support, custom templates

WHY CAREWRITE AI?

-  Built for care — not generic software

Created by people who understand supported living, learning disabilities, mental health services, and what inspectors actually look for.

-  Person-centred by design

AI writes in strengths-based language — focuses on what people can do and enjoy, not just their needs.

✅ Safety first — always

AI drafts. Humans approve. Nothing becomes an official record until your qualified staff review and sign it. Professional judgement stays with your team.

✅ Saves you real money

If each carer saves just 1 hour per week at £11.44/hr minimum wage — a 10-staff team saves £5,950 per year. CareWrite pays for itself many times over.

🧑 WHO IT'S FOR

Built for every corner of adult social care

- ✅ Supported Living Providers
- ✅ Residential Care Homes
- ✅ Home Care Agencies
- ✅ Learning Disability Services
- ✅ Mental Health Providers

👉 READY TO RECLAIM YOUR TIME?

Join the CareWrite AI Pilot Programme

We're onboarding a small number of forward-thinking care providers to test the platform, share feedback, and get set up before full launch.

What you get:

-  3 months FULL access — completely free
-  Dedicated onboarding & support
-  Your feedback shapes the product
-  Locked-in special pricing at launch
